

The 2007 Department of Energy's (DOE) New Mexico Regional High School Science Bowl will be held on **February 10, 2007**, at the Albuquerque Academy Science Center. Sandia National Labs, Lockheed Martin, and the Albuquerque Academy sponsor the local event. The DOE Science Bowl is a round robin/double elimination tournament-style academic competition that challenges and recognizes high school student's knowledge of science and mathematics. Up to 60 teams from regional high schools will compete to represent the state at the April 26-30, 2007 National Science Bowl in Washington, D.C.

Volunteers are needed to conduct the competitions. Moderators read the questions, while other volunteers act as time and scorekeepers. The competition starts at 9:00 a.m. and ends in the afternoon. Snacks and lunch will be provided to volunteers.

An optional training session will be held on Tuesday, February 6, in Building 10510, in the Sandia Science and Technology Park for volunteers who are unfamiliar with the competition or for those wanting a refresher.

Please contact **Sam Bono at 284-3226** if you have any questions.

Yes, I would like to help with the 2007 New Mexico Science Bowl
